PetBambi (PETB)

Community Token

White Paper

Version 1.3

Date

December 10, 2024

Disclaimer:

This whitepaper is for informational purposes only and does not provide financial, investment, or legal advice. Participants are encouraged to conduct their own research and consult professionals before engaging with cryptocurrency or PetBambi (PETB).

PetBambi's Story

PetBambi was born out of inspiration from stories like Rhett Mankind's TurboToad project, which motivated us to create something meaningful for the global crypto community. With general basic knowledge of technology and experience in community projects, we took a humble step forward, using our free time and our own resources to bring PetBambi to life.

The name PetBambi is very close to our hearts. It's inspired by our beloved family member, Bambi, and the favorite feature of our LuckyLootTube LIVE Giveaways: the "!petbambi" feature.

We designed the PetBambi ERC20 contract with trust and sustainability in mind, building a project based on which anyone interested can thrive. To ensure this, we implemented protections against early exploits. We also allocated a modest budget for the liquidity pool and introduced a reward system to encourage early engagement.

Early adopters who hold at least 1 million PETB tokens in their wallets will gain access to our monthly rewards through a simple dApp integration on our website. By joining us early, you can start collecting rewards immediately and secure your PETB tokens while the liquidity pool remains limited until we gain more funds. Enjoy the full benefits available until the contract is renounced, and the long-term success shared by everyone involved. **Thank you for your support and interest.**

Introduction

Community Governance

PetBambi (PETB) is intended to eventually operate without a formal governance mechanism, adopting a structure similar to Bitcoin. The project's smart contract is modeled to be fully renounced once everything is stable, eliminating any centralized authority or team control over its development or operations.

This guarantees that PetBambi (PETB) remains entirely decentralized once stable.

The ecosystem thrives on the active engagement and participation of its community. Holders and contributors play a pivotal role in driving the organic growth and evolution of the project. Guided by the collective input of its community, PetBambi (PETB) ensures that future developments align with the interests and values of its community.

Terms of Use and Responsibility

PetBambi (PETB) is designed to be open and accessible to anyone, enabling users to trade, utilize, or integrate it into various platforms and applications without requiring approval from any central authority.

The token (PETB) is available for unrestricted use, allowing individuals and entities to engage with it in ways that suit their needs. However, users are solely responsible for ensuring compliance with local laws and regulations concerning cryptocurrency use, trading, and taxation.

Tokenomics

Total Supply = 33.777.777.777 PETB

0% tax fees

Category	PETB Tokens (whole number)	Percentage (% of Total Supply)
Liquidity (locked LP for 12 months + Burn)	6.417.777.777,63	19
Airdrops & Rewards	4.391.111.111,01	13
Founder	4.391.111.111,01	13
Marketing	675.555.555,54	2
Circulating Supply	17.902.222.221,81	53

Wallet Roles and Circulating Supply Table

Liquidity Pool Wallet	19% = 6.4 Billion PETB tokens: <ul style="list-style-type: none">• Initial Allocation: 2.4 billion PETB for initial liquidity pool.• Remaining Reserve: 4 billion PETB for future rounds and burns.
Airdrops & Rewards Wallet	13% = 4.39 Billion PETB tokens: <ul style="list-style-type: none">• Allocated for ecosystem rewards and early adopters, ensuring fair distribution.
Founder Wallet	13% = 4.39 Billion PETB tokens: <ul style="list-style-type: none">• Tokens vested with 10% cliff each month, for 12 months.• Not part of the liquidity pool, subject to lock-up.
Marketing Wallet	2% = 675.56 Million PETB tokens: <ul style="list-style-type: none">• Used for project promotion, community rewards, and exchange listings.
Initial Circulating Supply (Month 1)	<ul style="list-style-type: none">• Tokens in initial liquidity pool: 2.4 billion PETB.
Growth Over 12 Months	<ul style="list-style-type: none">• Circulating supply grows as tokens from the founder wallet and liquidity pool wallet are gradually released.
Full Circulating Supply (Month 12)	<ul style="list-style-type: none">• Total circulating supply: 17.9 billion PETB tokens.

Transparency Note: While the Liquidity Pool Wallet holds 6.4 billion PETB tokens (19% of total supply), only 2.4 billion PETB tokens will be allocated to the initial liquidity pool. The remaining tokens are reserved for future liquidity rounds and strategic burns over the next 12 months. This ensures a sustainable long-term value for the project.

Contract Features Breakdown

The math behind the Uniswap Liquidity Pool

Liquidity Round 1

$$\text{Token Price} = \frac{\text{ETH in EUR}}{\text{PETB Tokens in Liquidity Pool}} = \frac{1400}{2.400.000.000} = 0.0000005833 \text{ EUR / PETB token}$$

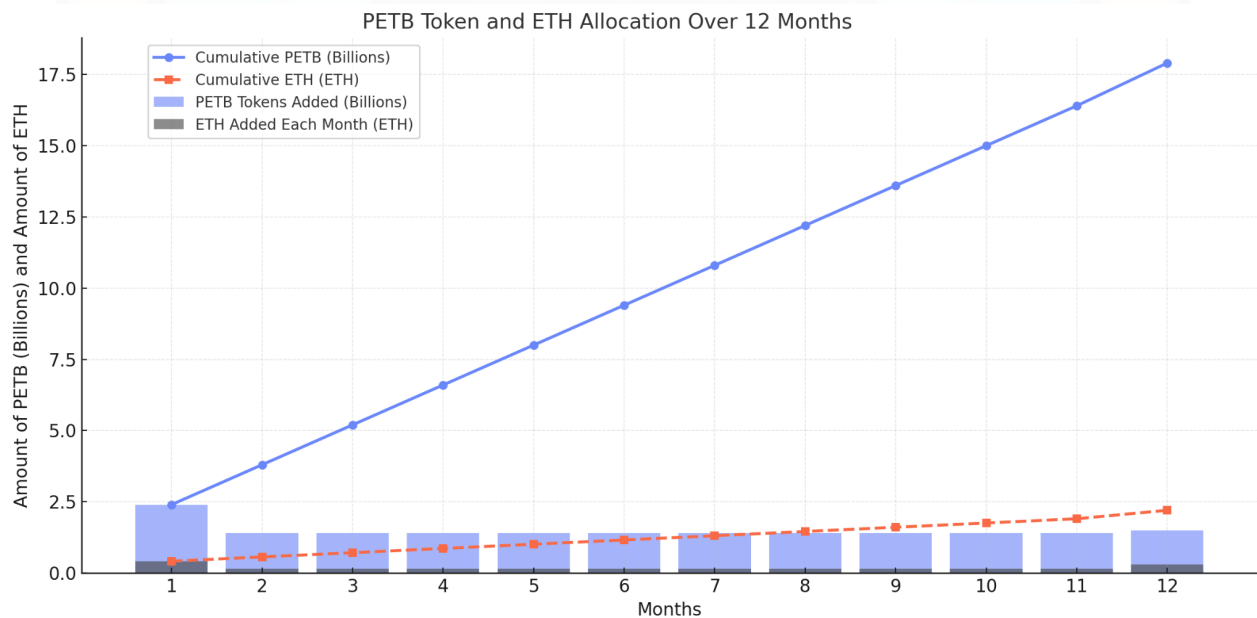

Liquidity Round 2 to 11

$$\text{Token Price} = \frac{\text{ETH in EUR}}{\text{PETB Tokens in Liquidity Pool}} = \frac{500}{1.400.000.000} = 0.0000005 \text{ EUR / PETB token}$$

Liquidity Round 12

$$\text{Token Price} = \frac{\text{ETH in EUR}}{\text{PETB Tokens in Liquidity Pool}} = \frac{1000}{2.902.222.221,81} = 0.0000003445 \text{ EUR / PETB token}$$

Sustainability Plan: PETB value grows through founder ETH contributions to the liquidity pool or community buying, while reducing supply by burning PETB tokens from the founder's 13% allocation and PETB (LP) tokens, ensuring a sustainable growth.

The Reward system

Total Rewards

$$M_{Reward} = T_{Circulating} * R_{PerToken}$$

- M_{Reward} = Monthly Reward Pool (Month1 is M1, Month2 is M2, and so on)
- $T_{Circulating}$ = Current PETB Circulating tokens
- $R_{PerToken}$ = Reward Per Token = 2% = 0.02 (by converting percentage into decimals)

$$M1_{Reward} = 2.400.000.000 * 0.02 = 48.000.000 \text{ PETB tokens}$$

$$M2_{Reward} = 3.800.000.000 * 0.02 = 76.000.000 \text{ PETB tokens}$$

$$M3_{Reward} = 5.200.000.000 * 0.02 = 104.000.000 \text{ PETB tokens}$$

$$M4_{Reward} = 6.600.000.000 * 0.02 = 132.000.000 \text{ PETB tokens}$$

$$M5_{Reward} = 8.000.000.000 * 0.02 = 160.000.000 \text{ PETB tokens}$$

$$M6_{Reward} = 9.400.000.000 * 0.02 = 188.000.000 \text{ PETB tokens}$$

$$M7_{Reward} = 10.800.000.000 * 0.02 = 216.000.000 \text{ PETB tokens}$$

$$M8_{Reward} = 12.200.000.000 * 0.02 = 244.000.000 \text{ PETB tokens}$$

$$M9_{Reward} = 13.600.000.000 * 0.02 = 272.000.000 \text{ PETB tokens}$$

$$M10_{Reward} = 15.000.000.000 * 0.02 = 300.000.000 \text{ PETB tokens}$$

$$M11_{Reward} = 16.400.000.000 * 0.02 = 328.000.000 \text{ PETB tokens}$$

$$M12_{Reward} = 17.902.222.221,81 * 0.02 = 358.044.444,43 \text{ PETB tokens}$$

Individual Wallet Rewards

$$\text{Wallet Reward} = \text{Wallet Balance} * \text{Reward Per Token}$$

$$\text{Wallet Balance} = \text{PETB tokens balance in your wallet}$$

$$\text{Reward Per Token} = \frac{\text{Reward Pool} * 10^9}{\text{Current Circulating Supply}}$$

$$\text{Reward Per Token} = \frac{48.000.000 * 10^9}{2.400.000.000} = 20.000,000 \text{ wei/token}$$

$$\text{Reward Per Token} = \frac{20.000,000}{10^9} = 0.02 \text{ tokens rewarded / token held in wallet}$$

$$\text{Reward Per Token} = 0.02 = 2\% \text{ (by converting decimals into percentage)}$$

Important Note: Your wallet requires minimum 1.000.000 PETB tokens in order to be eligible for the monthly reward. Also, the reward can be claimed from our website, once per month.

The Max Transaction amount (anti-bot mechanism)

Initial Max Transaction = 10.000.000 PETB tokens

The Max Wallet balance (anti-whale mechanism)

Initial Max Wallet Balance = 3 x Initial Max Transaction

Initial Max Wallet Balance = 30.000.000 PETB tokens

$$\frac{\text{Initial Circulating Supply}}{\text{Max Wallet Balance}} \Leftrightarrow \text{Number of Wallets} \Leftrightarrow \frac{\text{Total Circulating Supply}}{\text{Max Wallet Balance}}$$

Clarity Note: The maximum limits will double after 6 months and will be fully maxed out right before the contract renouncement. Rewards can still be claimed monthly, even if your wallet has reached the maximum wallet balance.

Contract Features Simplified

- PetBambi is built as a community-focused ecosystem, promoting growth for all. Rooted in fairness, sustainability, and inclusivity, it promotes unity and institutes a strong foundation for lasting value and mutual success.
- In order to ensure this mutual success, the contract implements a maximum wallet balance and adjustable transaction limits, providing equal opportunities for all participants. Once the community grows and more wallets reach their capacity, these limits will be increased to support continued expansion.
- A portion of the PETB circulating supply is allocated to the reward pool each month until renouncement, ensuring fairness and predictability for the entire PetBambi community. And any “extra” token will be burned before renouncement.
- PETB token holders can easily claim rewards using the "claimReward" function on our website's dApp. This function resets every 30 days, offering equal opportunities for all. Missed rewards from any month will accumulate and remain available for future claims, ensuring both flexibility and convenience.
- To maintain sustainability and prevent excessive network fees, holders must have at least 1 million PETB tokens (equivalent to 1 EUR) in their wallets to qualify for rewards.
- The reward system is designed to foster sustainable growth while engaging the community over time. By balancing consistent rewards, protective measures, and adaptive policies, PetBambi creates a fair and rewarding ecosystem that benefits everyone involved.

Roadmap

If PetBambi grows, we all grow.

With PetBambi (PETB), we're not just growing — we're growing together!

Our roadmap is built on fairness and community-first principles: Anti-Bot Protection to ensure secure trading, Anti-Whale Mechanisms to support all holders, No Pre-Sale for equal access, a Vesting Schedule for the Founder, and Delayed Ownership Renouncement to nurture a strong and sustainable ecosystem from the start.

Q4 2024 - Foundation & Momentum

- Smart Contract Finalization: Complete testing, refinements, and simulations of the smart contract on Sepolia testnets with Ganache and HardHat.
- Launch Our Website: Create the website structure and integrate the core "claimReward" function into a user-friendly dApp for seamless interaction.
- Launch Liquidity Pool on Uniswap V3: Pair PetBambi (PETB) with ETH to enable trading.

Q1 2025 - Early Grow

- Airdrops and Giveaways: Initiate early interest by planning and announcing community airdrops and small giveaways.
- Community Crowdfunding Campaign: Open opportunities for early supporters to contribute and benefit from PetBambi's growth.
- Explore gamification options: Develop engaging integrations to reward community participation, fostering a deeper connection with the project.

Q2 2025 - Awareness & Expansion

- Crypto Community Marketing Campaigns:
 - Engage with crypto forums (e.g., Reddit, Telegram, X, Discord).
 - Partner with influencers to highlight the project's potential.
 - Use platforms like X, Discord, or Telegram for community interaction.
- Targeted Airdrops: Distribute tokens to active communities or blockchain enthusiasts to spark discussions.
- Double the initial limits: Both the max transaction and max wallet balance limits will double 6 months post-deployment.

Q3 2025 - Security & Trust

- Build Trust: Publish progress reports and highlight decentralization efforts.
- Reach Public Partnerships: Find and collaborate with trusted partners.
- Propose Contract Audits: Validate the contract's security with trusted auditors.

Q4 2025 - Innovation & Utility

- Explore Cross-Chain Opportunities: Unlock new token utility by bridging the Ethereum contract with the Solana blockchain, enabling cross-chain liquidity and access to platforms like Raydium.
 - Charity Collaborations: Partner with humanitarian and animal welfare organizations to align Bambi's story with meaningful causes.
 - Renounce the Contract: Achieve full decentralization by renouncing the contract, ensuring PetBambi operates autonomously as a true community-driven token.
-

Let's PetBambi together!

Conclusion

Terms of Use and Responsibility

1. **No Personal Data Collection:** PetBambi (PETB) does not collect or store personal information from its users. The token's decentralized nature ensures that individuals can interact with the ecosystem without sharing identifiable data.
2. **Third-Party Interactions:** While PetBambi (PETB) itself is privacy-focused, any interactions with external platforms such as exchanges, wallets, or third-party applications are governed by their respective privacy policies. Users are encouraged to review and understand these policies before engaging.
3. **User Responsibility:** Community members are responsible for protecting their own privacy when interacting with third-party services. This includes securing their wallet credentials and being mindful of the platforms they choose to use.

Regulatory Compliance Notice

- PetBambi (PETB) is not classified as a security under current legal frameworks. Participants must adhere to AML and KYC regulations and ensure compliance with local laws.
- PetBambi (PETB) has no central owner or authority, allowing anyone to use it freely within the bounds of applicable laws.
- PetBambi (PETB) may be restricted in certain regions. Participants are responsible for ensuring compliance with local laws.
- This whitepaper provides information only and does not offer financial or investment advice. Consult a professional before making decisions.
